

Huayu Deng

PhD student at Shanghai Jiao Tong University working on deep learning, reinforcement learning, LLM post-training, and AI for physics. Currently a research intern at RedNote.

Education

- | | |
|--|--|
| Shanghai Jiao Tong University , Computer Science and Technology (Wu Wenjun Honors Class in AI) | Shanghai, China
Sept 2022 – present |
| <ul style="list-style-type: none"> • Advisors: Yunbo Wang, Xiaokang Yang • Research: deep learning, reinforcement learning, LLM post-training, AI4Physics • 7 first-/co-authored papers at CCF-A conferences, including an ICML 2026 Oral | |
| Shanghai Jiao Tong University , Computer Science and Technology (IEEE Honors Class) | Shanghai, China
Sept 2018 – June 2022 |
| <ul style="list-style-type: none"> • GPA 90.83/100, ranked 11/134 • Outstanding Graduate of SJTU, 2022 • Zhiyuan Honors Program (top 20% of the School of Engineering) | |

Experience

- | | |
|--|--|
| RedNote (小红书), Pevek Foundation Model Team , Research Intern
Large language model post-training. | Shanghai, China
Mar 2026 – present
7 months |
| <ul style="list-style-type: none"> • Worked on the full post-training pipeline of the Pevek foundation model, covering data construction, training configuration, evaluation, and regression testing. • Ran SFT, OPD, and RL post-training experiments, iterating on data mixtures, hyperparameters, prompt templates, and sampling strategies to improve general and domain-specific capabilities. • Used MS-Swift and Slime for training, and vLLM/SGLang for inference and evaluation, to support fast experiment iteration. | |
| Microsoft Research Asia (MSRA) , Research Intern
Conditional graphic layout generation (LayoutFormer++), advised by Jian-Guang Lou and Dongmei Zhang. | Beijing, China
July 2021 – Dec 2021
6 months |
| <ul style="list-style-type: none"> • Proposed LayoutFormer++: a constraint serialization scheme that unifies diverse user constraints into a token sequence, with a Transformer encoder-decoder for sequence-to-sequence conditional layout generation. • Proposed Decoding Space Restriction, a constraint- and probability-pruning strategy with backtracking to improve constraint satisfaction at inference time. • Achieved state-of-the-art generation quality and constraint satisfaction on RICO and PubLayNet across 6 layout generation tasks; integrated into Microsoft Office PowerPoint's Designer feature. • Published at CVPR 2023. | |

Awards

- | | |
|--|------|
| First Prize, SJTU Graduate Academic Scholarship
Awarded by Shanghai Jiao Tong University | 2022 |
| Outstanding Graduate (Undergraduate)
Awarded by Shanghai Jiao Tong University | 2022 |

Zhiyuan Honors Scholarship (Undergraduate)

2018-2020

Awarded by Shanghai Jiao Tong University

Academic Service

Reviewer: NeurIPS, ICML, CVPR, ICLR, AAAI
